Digital Assets

Digitally-maintained work-papers and their evidences

Built-in Smartness

Smart review and analysis of audit activities and outcomes

Collaboration

Improve collaboration within your team and across organisation.

and more...

What is an Audit Management System?

The intelligent Audit Management System (iAMS) is a web based application that manages the audits, their evidences and has an approval workflow to allow reviewing of work-papers by peers.

Auditors' challenges:

Work-papers on Excel and/or Word File.  

Discrete and dispersed audit evidences.

Too much manual administration.

Cumbersome working and communication in a large team
